This is a guidance tool, not a final decision - talk to your guidance counselor about what's right for you.

Course Details

BSIT-001 - BS Information Technology

Overview

BS Information Technology is a broad, hands-on tech course that trains students to install, manage, and troubleshoot the computer systems organizations depend on every day. It's not limited to one specialization, depending on the electives and specialization track a school offers, IT graduates can move into network administration, cybersecurity, systems/database administration, technical support, UI/UX design, or entry-level software and web development. The course emphasizes applying and maintaining existing technology to solve real business problems, making it a practical entry point into almost any tech-related career.

Where Can You Study?

- Bicol University Polangui - Polangui, Albay - Public
- Bicol University Legazpi (College of Science) - Legazpi City, Albay - Public
- Ateneo de Naga University (College of Computer Studies) - Naga City, Camarines Sur - Private
- Southeast Asian University of Technology (SEAUTech, formerly BISCAST) - Naga City, Camarines Sur - Public
- Note: Currently, no public community college in Albay offers a full BSIT program. Students in far-flung municipalities can start with a TESDA Computer Systems Servicing NC II or Programming NC II short course (often available at local community colleges or TESDA centers) as an affordable first step before or alongside a 4-year IT degree.

Where Can This Path Lead?

- IT Support Specialist/Technician - PHP 16,000-PHP 25,000/mo entry-level
- Network/Systems Administrator - PHP 18,000-PHP 28,000/mo entry-level
- Web Developer - PHP 18,000-PHP 30,000/mo entry-level
- Data Analyst - PHP 20,000-PHP 32,000/mo entry-level (increasingly common path for IT grads who take extra data/analytics electives)
- Cybersecurity Analyst (junior) - PHP 20,000-PHP 30,000/mo entry-level, typically requires additional certification (e.g., CompTIA Security+)
- Government IT Officer I - PHP 31,705-PHP 33,611/mo (DBM Salary Grade 11, 2026 rate)

Guidance Tips

Free introductory resources such as HTML and CSS tutorials on YouTube or Sololearn can help students get a feel for the technical side of IT early on. Some students only realize later that IT work tends to be logical and repetitive rather than exciting, so this kind of early exposure is worth the time. Once in college, TESDA or vendor certifications such as CompTIA or Cisco NetAcad can strengthen a graduate's chances when applying for a first job.
